Video conferencing as it should be.

Empower your organization with face-to-face communication,
no matter the location or technology.

Pexip Infinity—Self-hosted video conferencing platform

Full control, unmatched capabilities.

When you want full control over your video conferencing infrastructure and media, you choose Pexip Infinity. It is a software-based self-hosted video conferencing platform with all the benefits of the cloud, but entirely under your control. You can deploy Infinity in a multitude of ways, including in a cloud subscription on for instance Microsoft Azure, AWS, or GCP, or even on-premises if that is a requirement. Infinity can help you migrate to the cloud at your own pace. And of course, Infinity features all of the features that you have come to know from Pexip.

With a self-hosted solution you stay in control of deployment, data, and media traffic.

Runs in any public or private cloud, or even on-premises in your own data center as needed.

Features all the features you know from Pexip, and is continuously updated so you can be too.

Single-screen management solution allows administrators to quickly and simply manage a world-wide deployment from wherever they want.

Completely customizable to fit your organization's brand and ways of working, so it adapts to how you work, not the other way around.
