

Pexip One-Touch Join.

A Simplified Joining Experience

Create a single, seamless joining workflow for any professional video meeting.

Maintain native joining workflows

One-touch join simplifies and standardizes the workflow used to join all your video meetings. Users can join almost any type of video meeting at the push of a button - whether it's hosted within a Pexip VMR, a Microsoft Teams Meeting, Google Hangouts, or many other services - and whether it's internal or external to your organization.

Flexible deployment

Works with any type of Pexip solution, both as a licensing option for Pexip Infinity (self-hosted/on-prem), or as a part of your Pexip Service plan (as part of RoomConnector Bundle or as a stand-alone solution).

Calendar integration

Securely integrates with supported calendar environments:

- Outlook: Microsoft Exchange on-prem 2013 or later, Office 365/Exchange online
- Google Calendar

Professional services

One -Touch Join requires your IT team to host and manage the One-Touch Join software in order to securely communicate with your organization's calendar environment. Our professional services package ensures everything is set up and implemented correctly from the start.

Supported meeting types

Easily join any professional meeting:

- Pexip
- Skype for Business On-prem/O365
- Google Hangouts Meet
- Microsoft Teams
- Professional meeting solutions (can support SIP/H.323 dial-in).
Including: GoToMeeting, Cisco/WebEx, Poly, BlueJeans, Zoom & more.

Supported meeting room systems

Works for Cisco & Polycom professional video conferencing systems (SIP/H.323 devices):

- **Cisco:** Any Cisco endpoint supporting version TE & CE
- **Polycom:** Endpoints supporting Poly One-touch Dial

MeetingConnect with mobile “scan-to-join” technology

MeetingConnect offers an easy workflow that allows users to join their video meetings from any meeting room.

How it works:

- Use the Pexip admin platform to assign a unique QR code or NFC tag for each of your video systems
- Place the QR code or NFC tag in the meeting room next to the associated video system
- Schedule a new video meeting and invite your guests - there is no need to add the video system/meeting room to the invite
- When ready to join, participants enter the meeting room and, using the Pexip mobile app, scan the QR code or NFC tag to remotely connect to the video system
- Tap to accept the connection on the video system to join the meeting

Ideal for:

- Agile, distributed workforces with high volumes of internal and external meetings, where hosts and guests do not always know which meeting rooms will be used for individual events
- Organizations with limited dedicated IT resources to manage Pexip One-Touch Join
- Organizations who have hardware infrastructure from other manufacturers than Cisco/Polycom
